

Asad Ijaz

Data Scientist and Automation Developer

Summary

Data scientist and automation developer who turns real-world problems into data-driven solutions. Builds end-to-end machine learning projects, from churn prediction to recommendation systems, plus LLM agents and chatbots with LangGraph and agentic RAG. Strong Python, on a software engineering base of C++, C#, SQL and Laravel.

Experience

Data Scientist

Jul 2026 to present

Optimum Tech, Punjab, Pakistan

- Builds and evaluates machine learning models in Python for predictive analytics, from data preparation to results.

Laravel Developer

Jul 2025 to Feb 2026

IMPEKT Limited

- Developed and maintained web application features with Laravel and SQL databases.

Laravel Developer

Jan 2024 to Dec 2025

Optimum Tech, Punjab, Pakistan

- Built backend and frontend features for Laravel web applications.

Projects

Agentic RAG with hybrid search and reranking

LangGraph, RAG

LangGraph agent that routes each question, retrieves with dense and BM25 search, reranks, grades results and corrects itself.

Aura Accessories shopping assistant

LangGraph, Groq

Agentic RAG chatbot for a luxury fashion brand, built as a LangGraph ReAct agent running on Groq.

AI email dispatcher

LangGraph, Gemini

Streamlit app where a Gemini-powered LangGraph workflow writes, themes, illustrates and sends personalised email.

Autonomous LinkedIn publisher

Multi-agent

Multi-agent pipeline that researches a trending data science topic, writes the post, fact-checks it and publishes.

Next-word predictor

TensorFlow, Keras

Embedding and LSTM network in TensorFlow and Keras, trained on a novel to predict the next word and generate text.

Churn prediction and recommendation systems

scikit-learn

End-to-end machine learning projects: data preparation, modelling and evaluation with Python and scikit-learn.

Education

BS Computer Science

Sep 2024 to Aug 2028

University of Agriculture, Faisalabad

Skills

Data and machine learning

Python, Pandas, NumPy, SciPy, scikit-learn, TensorFlow, Keras, PyTorch, MLflow, Matplotlib, Plotly

LLM systems

LangGraph, agentic RAG, hybrid search, reranking, Streamlit, Gemini, Groq

Software

Flask, Laravel, C++, C#, .NET, SQL, MySQL, Selenium, Docker

Certifications

The Ultimate Job Ready Data Science Course
